**Subject:** Microsoft Settlement

I have been using computers for about 16 years now, having started on the Commodore line of computers. I have actively watched the computer industry over the years and have seen Microsoft turn into the most predatory and dominant company in the computer industry. I have read the proposed settlement and it does nothing to prevent their predatory and illegal actions nor to penalize them for illegal actions past. I strongly urge that this proposal be rejected and tougher restrictions and penalties for past illegal activities be drafted into a new agreement. Again, I am against this settlement.

Sincerely,  
Rob Rati
